

Aerial Work Platform

Aerial Work Platform - There are various forklift accessories offered on the market. They can help transform your lift truck so that you can expand your ability to pick stuff up or accomplish clean up jobs and material handling with greater ease.

Lots of the accessories are particularly designed to be able to fit on the forks themselves. Fork extensions for instance, are used if you require more fork length, which increases lifting capacity. Fork extensions come in lengths varying from forty eight to one hundred twenty inches. Rounded or triangular attachments are another variety used when transporting rolled material to be able to ensure it does not roll off of the traditional flat blades.

Examples of lifting attachments consist of pivoting and telescoping boom or crane accessories. They can come in quite a few various styles and are normally meant for transporting metal bars, lumber, poles and various types of bulky items. Other accessories like for instance different styles of hook plates and hooks are existing in order to lift things with a chain or sling. Magnetic lifters and slab lifters are other things which can be used along with hook accessories. Slab lifters are specialized attachments that are utilized for carrying different materials which are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools that attach to your lift truck in order to make moving rolls of carpet easier. The attachment connects onto the forklift's forks and has a pole that goes through the middle of the carpet roll.

There are various kinds of forklift accessory intended for facility maintenance such as snow blades. These industrial forks could be connected to front end loaders and designed for moving materials such as dirt, and mulch as well as snow. Other popular cleanup accessories consist of standard sweepers and magnetic sweepers. Standard sweepers includes a broom which the lift truck forks connect onto for sweeping large spaces like parking lots or warehouse and factory floors. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up fast and effortless.

A material spreader is another lift truck attachment which is normally used at facilities. These spreaders are helpful for a range of applications like for example spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Another optional lifting accessory are work platforms. These could be utilized by lots of different companies day after day. Platforms may range in size from 36" x 36" to up to 60" x 60". Several units may be available and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location with the use of the forklift. Larger platform models have extra space for staff so as to carry tools and other essential items for the task. Usually work platforms are made of poly material or steel.
