

JLG Forklift Parts

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora set out on a cross country excursion in their RV. Freshly retired, after spending many years working with his brother to manufacture their crane business into an market leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road expedition.

Whilst on their journey, John spent time talking to previous business associates whom the Groves stopped to see along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John discovered a substantial market for a product that could promptly and securely lift individuals in the air to accomplish upkeep and other construction functions.

Following their return from holiday, John set up a joint venture with two of his friends and obtained a metal fabricating business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates many of the basic design elements of that original lift into current designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the company has extended itself into many different international marketplaces and continues to cultivate new machines to ensure that clients are able to become safer and more efficient within their workplace.
